EE25BTECH11053 - Surya Sri

Question:
Find a vector of magnitude 5 units, and parallel to the resultant of the vectors $\mathbf{a} = 2\hat{i}+3\hat{j}-\hat{k}$ and $\mathbf{b} = \hat{i} - 2\hat{j} + \hat{k}$.

Solution:

Let the required vector be $\mathbf{R}$,

$$\mathbf{R} = k\frac{(\mathbf{a}+\mathbf{b})}{\|(\mathbf{a}+\mathbf{b})\|} \tag{1}$$

According to the question k = 5 ,

$$\mathbf{a} = \begin{pmatrix} 2 \\ 3 \\ -1 \end{pmatrix} \tag{2}$$

$$\mathbf{b} = \begin{pmatrix} 1 \\ -2 \\ 1 \end{pmatrix} \tag{3}$$

$$\mathbf{a}+\mathbf{b} = \begin{pmatrix} 3 \\ 1 \\ 0 \end{pmatrix} \tag{4}$$

So,

$$\mathbf{R} = 5\frac{\begin{pmatrix} 3 \\ 1 \\ 0 \end{pmatrix}}{\sqrt{3^2+1^2+0^2}} = \frac{5}{\sqrt{10}}\begin{pmatrix} 3 \\ 1 \\ 0 \end{pmatrix} \tag{5}$$

$$\boxed{\mathbf{R} = \frac{5}{\sqrt{10}}\begin{pmatrix} 3 \\ 1 \\ 0 \end{pmatrix}} \tag{6}$$
